water conservation

Water is one of our most precious natural resources.

Businesses account for about 62% of the world's water usage.

Conserving water isn't as hard as you might think.

Water efficiency rebates available from most water authorities.

Unisan provides proven products sourced from around the world.

touchless technology

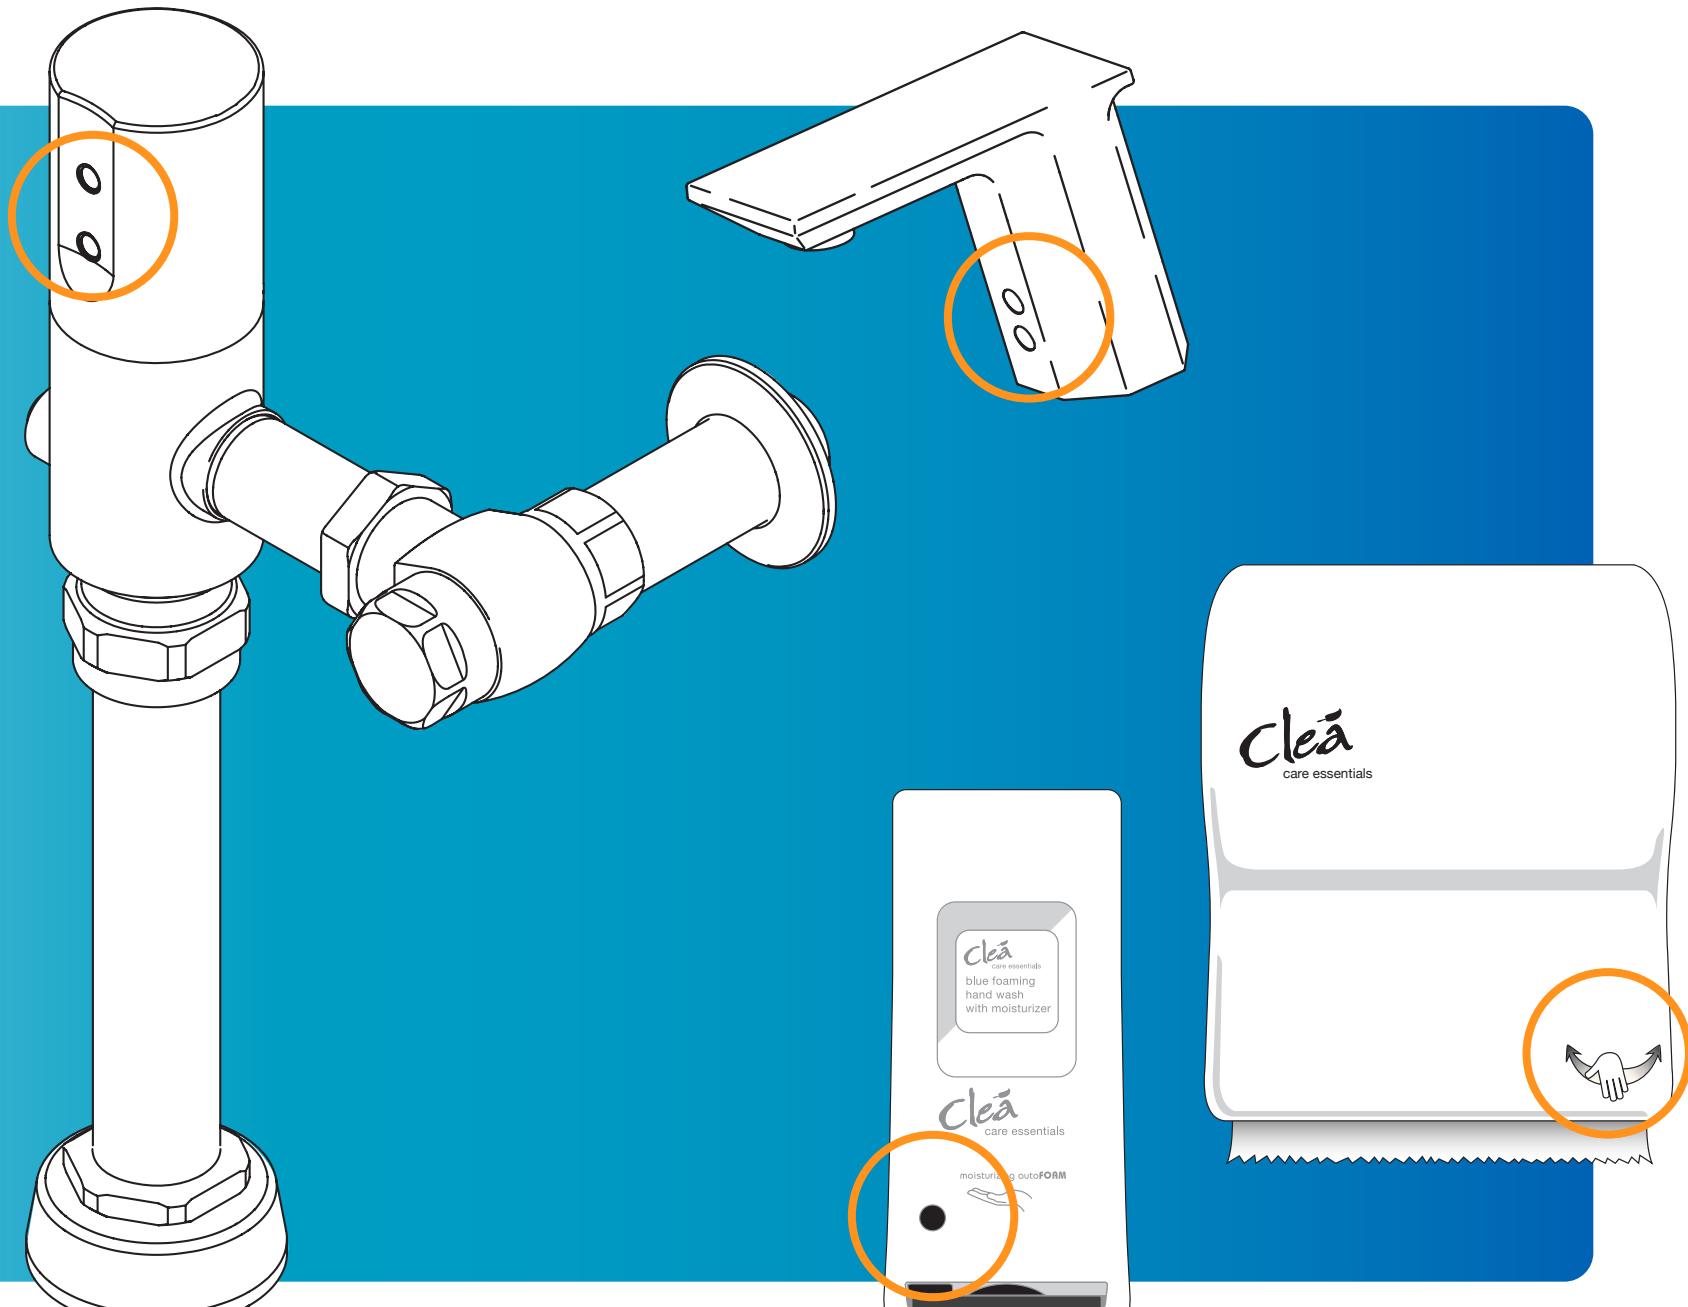

The modern restroom will be touchless.

Recent studies have shown that 91% of all restroom visitors prefer a touch-free restroom.

Studies also show 30% more people will wash their hands if touch-free products are provided.

Benefits:

- no cross contamination
- greater water savings
- less vandalism
- less waste
- odor control

restroom buildout

Restrooms make a statement about the company itself; the values, how employees are treated and dedication to a healthy work environment.

It is possible to be environmentally responsible, have an efficient and pleasing atmosphere, and save money! Efficiencies in package selection combine with the elimination of redundancies allow a higher amenity level for the same or reduced cost.

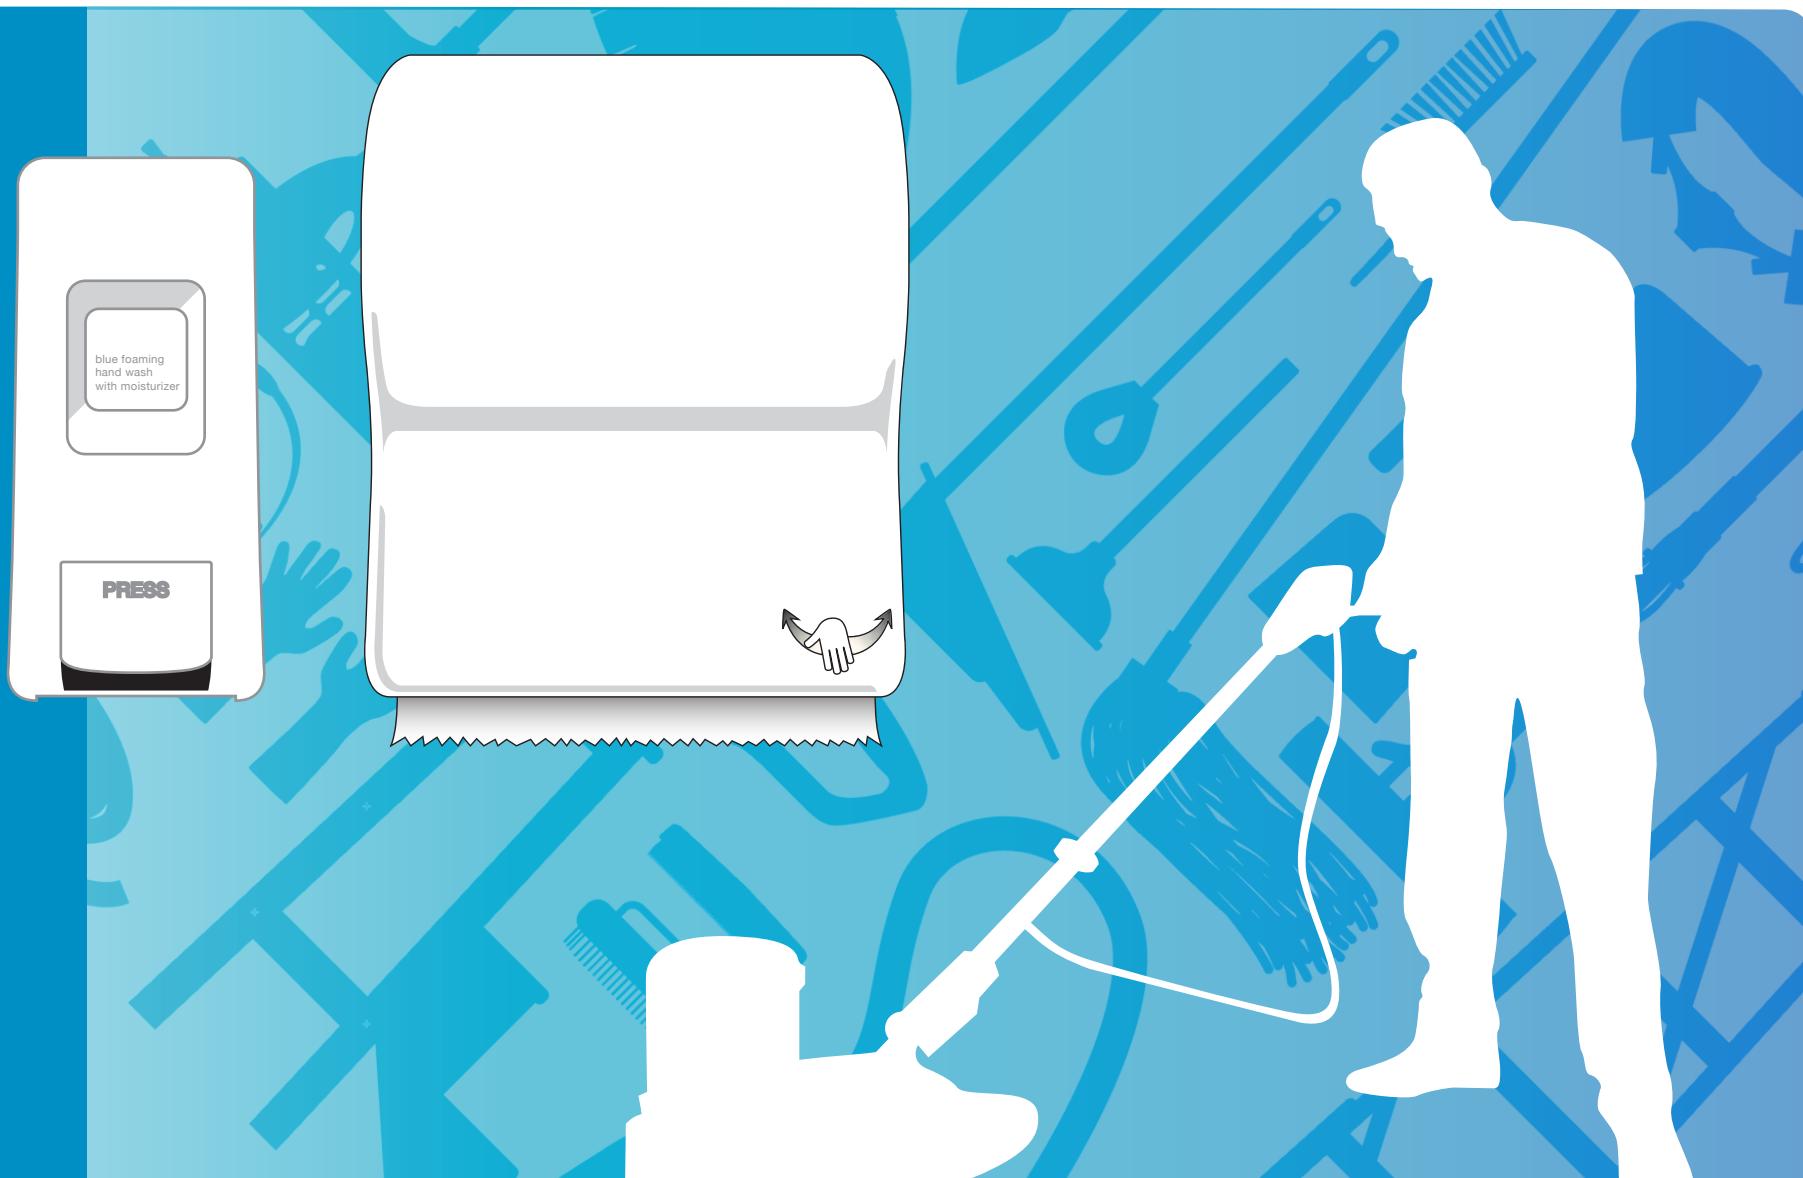

An average business spends several times its facilities costs on human resources. Thus investment in more comfortable, hygienic, facilities can be leveraged many times in labor efficiency savings.

Even during times of market fluctuations, you can maintain and even increase staff effectiveness. Enhance retention rates and lower absenteeism through health enhancing restrooms. Unisan allows for low cost and no hassle recon-figurations.
